Plain Paper ROS Integration with Motor Vehicle Software Corporation

Tired of wasting time and money managing your CA DMV Reports of Sale forms?

Data Consultants together with Motor Vehicle Software Corporation (MVSC) is now offering a digital DMV Report of Sale forms solution that allows you to print the new and used California ROS, (REG 397 & REG 51), on plain paper.

Description
As the name suggests, Plain Paper ROS Integration allows you to print Reports of Sale on plain paper rather than on DMV pre-printed forms. A unique, DMV assigned, ROS number is printed on each ROS. This process replaces the need to procure and manage the pre-printed books of ROS forms.

ROS Manager
Another feature of Plain Paper ROS Integration is the ROS Manager. The ROS Manager allows you to see which ROS numbers have been used, and to view or reprint ROS copies. You can also report specific Reports of Sale as Missing, Void, or Destroyed.

Supported Products
Plain Paper ROS Integration is available for users of the Data Consultants web product, Grapevine eF&I. This product is not currently available for users of the legacy Grapevine F&I product.

Cost
Won't cost you a dime; zip, nada.

Signing Up
Contact Data Consultants tech support at 800 284-8469 and ask for Plain Paper ROS Integration for your eF&I account. We'll provide you with a short and easy agreement to sign and return to us.

Conclusion
We are pleased to be able to bring you this great product. Plain Paper ROS Integration will save you time, hassle, and money.

Please contact us with any questions.
